

Static Pressure Sensor Heat Sink

Features

- Effective solution for high media temperatures
- Easy mounting

Specification

Material	Stainless steel 1.4305 / AISI 303
Pressure connections:	
System	½" BSP male
Sensor	½" BSB female
Media	Liquids and gases
Media duct	Ø4mm
Dimensions	123 x 30mm
Country of origin	Switzerland

Product Codes

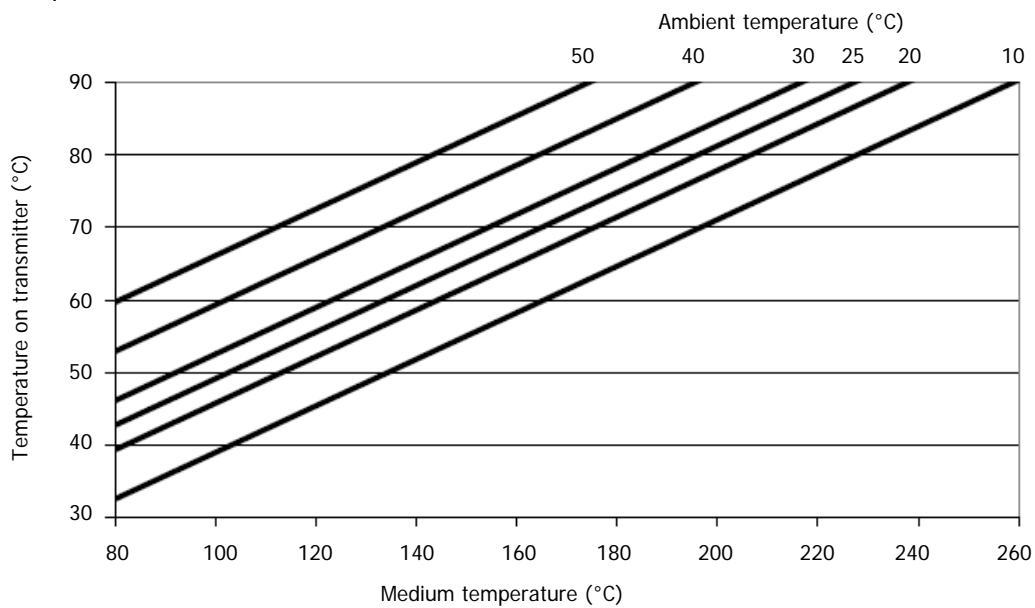

PL-HS
Heat sink

Technical Overview

The PL-HS heat sink enables the PL-507, PL511 or PL-691 sensors to be used on systems where the medium has a higher temperature than the sensor allows.

The cooling fins effectively transfers the heat, depending on the ambient temperature. Systems with a medium temperature of more than 80°C or 125°C can be monitored without harming the sensor.
